- Height | 9.5 ft.
- Shade Area | 1200 sq. ft.
- Weight | 3000 lbs.
- Warranty Period | 5 years

Our flagship model for maximum protection for your livestock. The SH1200 is a workhorse that no grazer should be without. Heavy-duty steel frame and knitted polypropylene shade canopy for 1200 sq. ft. of shade. Deploy and retract the canopy in minutes for easy transport. Designed to support herds of 50-55 cattle.

Specifications

- Span | 30 ft.
- Height | 9.0 ft.
- Shade Area | 650 sq. ft.
- Weight | 2000 lbs.
- Warranty Period | 5 years

The SH600 is a smaller version of the SH1200 with the same functionality and durability as the larger model. It is constructed with a heavy-duty steel frame and a knitted polypropylene shade canopy that can be collapsed in the event of severe weather or for easy transport. Perfect for herds of 25-30 beef or other livestock.

" I put the cows where there are no trees in the daytime and use the shade to manage my nutrients."

Francis Thicke, Fairfield, IA

"The advantage of the Shade Haven is you can put the Shade on the top of a knoll where most of the air flows. . . and if you move the Shades daily, you are on fresh ground and fresh lie down area every day."

Jim Powell, Limestone, TN

"For us, the Shade Haven is more than an investment. It aligns with our vision of innovation, quality products and quality of life for our animals. It's cool, it's innovative and it provides real value."

Andrea Young, Delaplane, VA

"Shade is an investment not a cost, because it allows your cattle to perform better and it allows you to have a much more optimal grazing program."

Dr. Allen Williams, Grass Fed Beef LLC Founder

"I'm looking for the day when shademo-biles dot the countryside with every herd of cattle."

Joel Salatin, Stockman GrassFarmer, Dec. 2017
